Purpose

My website will be a house plant care guide website. The website will display different types of house plants and offer details of how to care for them such as watering schedule, how much sunlight they need, etc.

Audience

I think the primary audience for my website will be people looking to care for their houseplants. I think this website will be useful because I myself struggle a lot with managing how to care for my houseplants especially when I have many different types that all need to be cared for differently. The internet is good for finding information on how to take care of house plants but I think good dedicated house plant care websites are hard to find.

Content inventory

I will need a landscape image for the website header. I will need two tabs, a page for the general houseplant layout and another page for users saved house plants. I will need multiple images of house plants as each one will have a display card, I will also have a descriptive text for each house plant and text that breaks down their basic care routine.

Website header (I made this in canva)

- Headline: “Houseplant Care Made Easy”

feature blurbs - I have 3 blurb icons form Phosphor icon, they are svg icons so I can’t display them in google docs

- Blurb 1 water icon
    - Title: “Watering Made Simple”
    - Text “Learn how often each plant should be watered”
- Blurb 2 sun icon
    - Title: “Providing the right amount of light”
    - Text “Figure out if your plants need direct light, indirect light, or low light exposure”
- Blurb 3 plant icon

- Title: “Keep your plants healthy”
- Text “Get simple care tips for your plants. Following the provided guidelines will help keep your plants healthy”

Feature image (Photo by vadim kaipov on Unsplash)

- Title: “Houseplant care does not need to be complicated”
- text : “Every houseplant has different needs, from how often it should be watered to how much sunlight it receives. This guide brings the most important care information together in one place so you can spend less time searching and more time helping your plants thrive. “

Secondary content blocks (from google images with creative commons license)

Image 1: snake plant

- Description: “Snake plants are hardy, low-maintenance houseplants that prefer indirect light but can tolerate lower-light conditions. Allow the soil to dry completely between waterings, typically watering every two to three weeks. “
- Light: “Low to bright indirect light “

- Water: “Every 2–3 weeks”
- Difficulty: “Easy ”

Image 2: Aloe plant

- Description: “Aloe vera prefers bright light and dry soil. Place it near a sunny window and allow the soil to dry completely before watering again. Overwatering is one of the most common problems when caring for aloe. “
- Light: “Bright light“
- Water: “Every 2–3 weeks ”
- Difficulty: “Easy ”

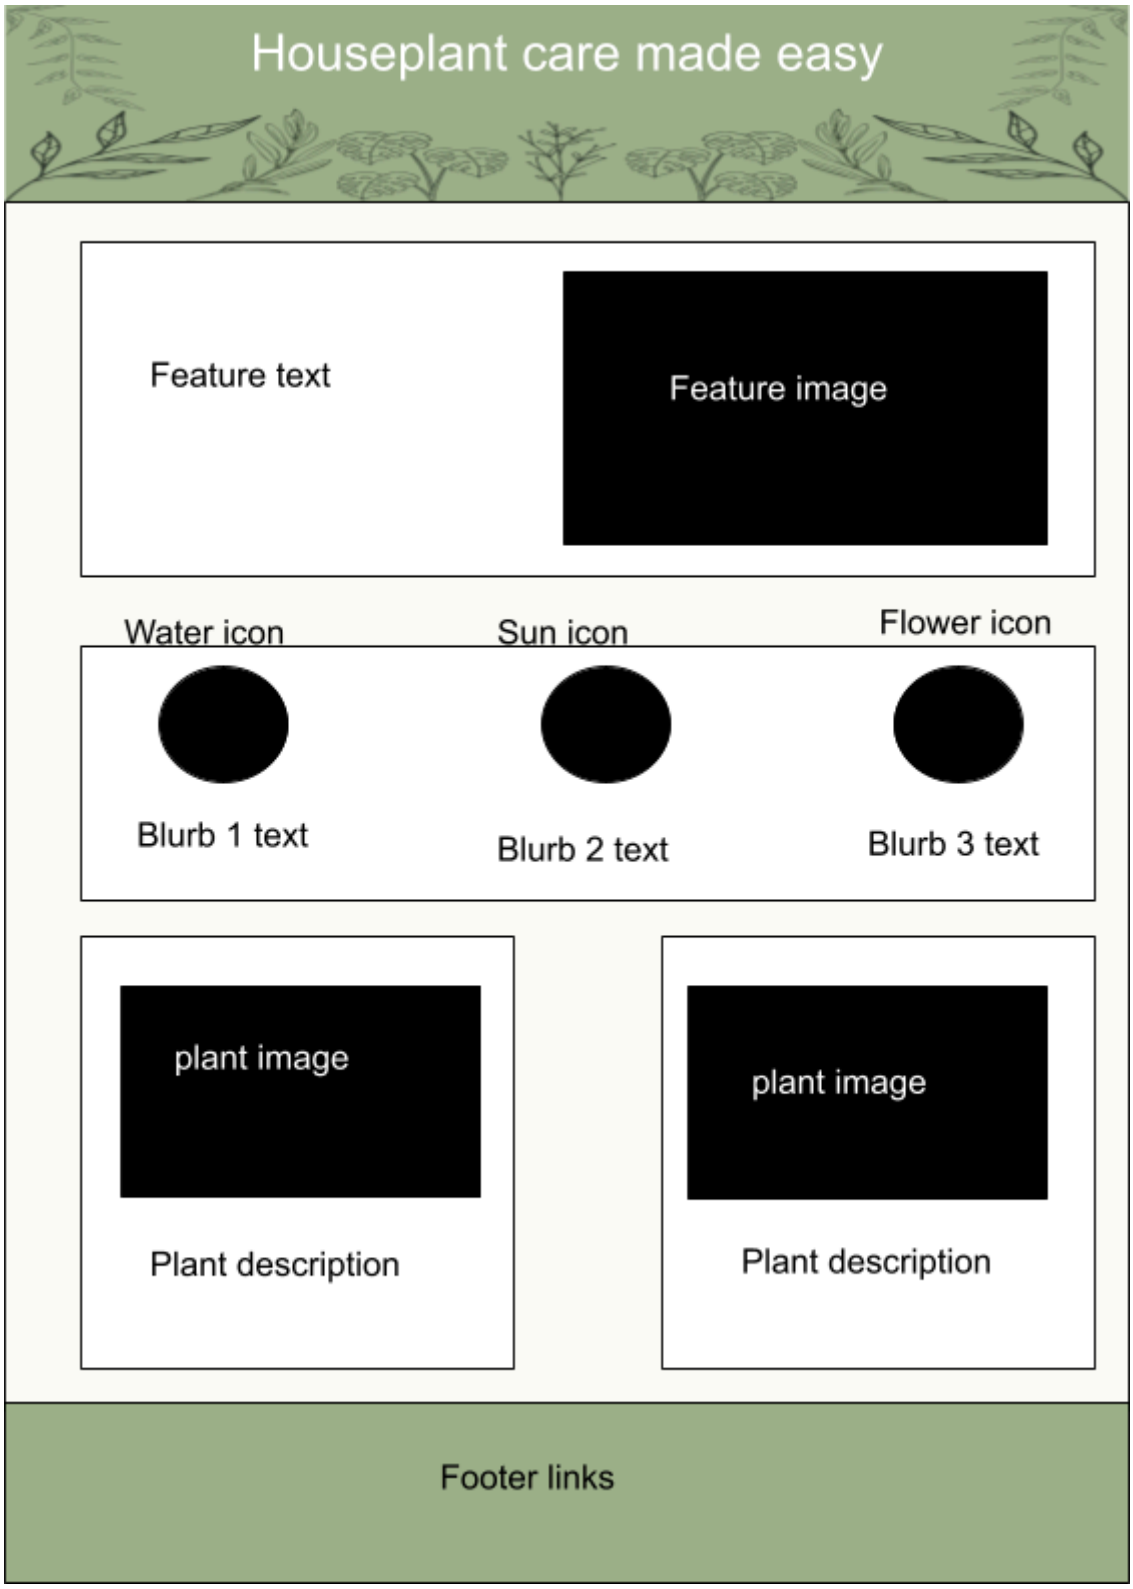

Footer - (I made this in canva)

- Links: Plant Care, My Plants, About, Contact

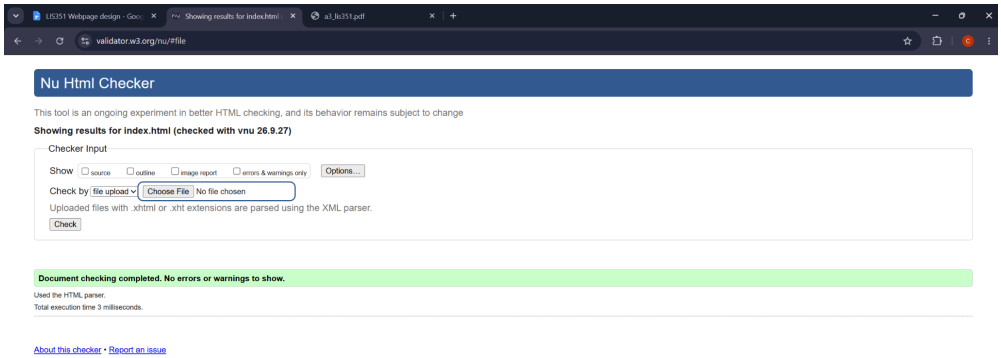

color theme

- The headers and footers are color #9eb18b
- The main background of my website will be a warmer white color #fafaf5
- The background of my main feature card, blurb blocks, secondary feature card, will be white #FFFFF
